

Welcome to docoGen!

Yung-Sheng Lu

November 7, 2017

Abstract

docoGen is a document generation tool within your masterpiece. docoGen WebUI is supported from docoGen package which can generate web page to demonstrate the document. docoGen WebUI is based on Sementic UI React currently. In future, we will support more web UI library and become more flexible to use. docoGen Project is an open source project for more convenient and widely used in document generation. If you are interest in this project or repository, please contact with us and feel free to ask us any question. We are very welcome you to join our group.

1 Getting Start

About docoGen

- docoGen is a document generation tool within your masterpiece.
- docoGen Project is an open source project for more convenient and widely used in document generation. If you are interest in this project or repository, please contact with us and feel free to ask us any question. We are very welcome you to join our group.
- docoGen WebUI is supported from docoGen package which can generate web page to demonstrate the document. docoGen WebUI is based on Sementic UI React currently. In future, we will support more web UI library and become more flexible to use.

5 Code Listing Structure

Code Listing Demo 1

```

1 #include <stdio.h>
2
3 int main(void) {
4     printf("Hello World\n");
5     return 0;
6 }
```

Listing 1: example.c

```

1 #include <iostream>
2
3 using namespace std;
4
5 int main(void) {
6     cout << "Hello World" << endl;
7     return 0;
}
```

```
8 | }
```
